

## Updates

The CRC Team is excited to announce that construction on the Fitness Center Expansion will officially begin this week. The Morgan Hill City Council awarded the construction contract to Magnum Construction. The mobilization has begun two weeks ahead of schedule, with our official start date for construction on Monday, October 19, 2009. This early start date is good news because it also moves target completion date up earlier, to April 16, 2010. We will be providing these weekly updates to keep you up to speed on the project's status.

## What to Expect

### Next Week:

- This weekend construction fencing will go up around the construction area and parking staging area. This staging area will be located in the small eastern section of the parking lot directly north of the Gymnasium.
- Early in the week much of the landscaped area where the new construction will be taking place will be relocated to other areas around the CRC.
- The construction area will begin to be cleared and construction staking will go into place
- On Monday, the emergency exit to the exterior of the building from the Fitness Center will become inaccessible.

### Near Future:

- Interior work to begin on new office area and entry area.

## Impacts to Members

With the area directly outside the Fitness Center becoming the construction area, the existing emergency exit will become unusable. The primary entry will need to be used as the emergency exit. To help create more room in the Fitness Center a limited amount of cardio equipment will be moved to the hallway area. An additional fan and televisions are being added to this area to create a better experience.

We will be losing about ten parking spaces that will be used as staging for the construction. These parking spaces will be out of service for the entire construction period. Hopefully the recent addition of parking earlier this year will offset this temporary loss.

## Tell Us What You Think

While we anticipate some impacts during construction, the staff at the CRC is committed to mitigating these impacts as much as possible. Let us know how we are doing, by filling out a comment card, talking to our staff, or emailing us at [chris.ghione@mhcrc.com](mailto:chris.ghione@mhcrc.com). We really feel the final project will be "worth the weight".
